Skillset

Languages	JavaScript • Python • Html5 • CSS3 • No-SQL
Technologies	ReactJs • Redux • NodeJs • Git • Googling
Platforms	GitHub • Firebase • Heroku • MongoDB
Soft skills	Good Listener • Problem-solving • Resilience • Strong work ethics

Selected Projects

`Ani cart -`   - live | source

react, redux, MongoDB, firebase

An e-commerce store website with full-fledged functionalities.
Designed an eCommerce website with React as a frontend and nodejs as a backend server.
Used Redux for easy state management across the whole app. Also implemented google
authentication for logins using firebase auth.

`Box World Game -`   - live | source

react, redux

A word-building game.
Designed a word-based web game, I used to play as a kid with pen and paper, implemented in
ReactJs in which each player is required to add a letter to the game board and then make a
word out of present letters on the board to score a point.

`Movie Town -`   - live | source

react, RestAPI

Designed a mobile-friendly movie description site with a Searchable option using React.
It fetches movie data from a public Rest API and displays its information to the users.
